The MAILING DATE of this communication appeariod for Reply	opears on the cover sheet with the c	orrespondence address						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or

REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)

- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (I) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Art Unit: 3726

Claim Objections

2. Claim 8 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim 6. See MPEP § 608.01(n). Accordingly, the claim 8 has not been further treated on the merits.

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 7-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7 recites the limitation "the contact area" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim 8 recites the limitation "the contact area" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3726

6. Claims 1 and 7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 1525895 to TRW.

TRW discloses a process for manufacturing a cooling channel piston which has a cooling channel (43) approximately in the area behind a ring belt (115), where a piston blank (see Fig. 5) is shaped at least partially in a forging process, characterized in that at least one circumferential shoulder (26) is formed, behind the at least one should a recess (29) is introduced and than the at least one shoulder is reshaped by means of deformation such that the recess is closed by the at least one shoulder to create the cooling channel.

Regarding claim 6-7, the shoulder is rigidly connected to the piston blank.

Regarding claim 8, a sealing means (119) is apparently provided.

7. Claims 1 and 7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 1210302.

Regarding claim 1, DE '302 discloses a process for manufacturing a cooling channel piston (Fig. 4) which has a cooling channel (h) approximately in the area behind a ring belt (no ref., see Fig. 4), where a piston blank (Fig. 6) is shaped at least partially in a forging process, characterized in that at least one circumferential shoulder (e) is formed, behind the at least one should a recess (f) is introduced and than the at least one shoulder is reshaped by means of deformation such that the recess is closed by the at least one shoulder to create the cooling channel.

Regarding claim 6-7, the shoulder is rigidly connected to the piston blank.

Regarding claim 8, a sealing means (f) is apparently provided.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

9. Claims 2-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over either TRW or DE '302 the *Mechanical Engineers' Handbook* (select pages).

TRW and DE '302 disclose the invention cited above. In both the shoulder is either squeezed or bent. However, the exact means for deforming are not known.

Pages 920-924 of the *Mechanical Engineers' Handbook* discuss conventional cold-working process for squeezing and bending including thus claimed by Applicant. A person skill in the art is able to select the one most appropriate.

Regarding claims 2-5, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have deformed the shoulder of either TRW or DE '302, by forging, swaging, driving through a hollow form, and/rolling, in light of the teaching of the *Mechanical Engineers' Handbook*, in order to bend or squeeze the shoulder effectively. See MPEP 2183 (selection of equivalents recognized in the art for the same purpose supports a case of prima facie obviousness.)

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric B. Compton whose telephone number is (571) 272-4527. The examiner can normally be reached on M-F 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David P. Bryant can be reached on (571) 272-4526. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
